

Fukushima Daiichi Nuclear Power Station Unit 3 Reactor Building Operating Floor Area Investigation

< Reference >

July 10, 2012

Tokyo Electric Power Company

Purpose

The operating floor will be investigated in order to provide inputs on the debris removal plan for the upper part of Unit 3 Reactor Building.

*The investigation will be done as necessary depending on the progress of site operations.

Schedule

July 11-12, 2012

*The schedule may change depending on the weather condition (July 12: Extra day).

Investigation outline

Acquire moving images of the operating floor by a camera hanging down from a crawler crane (remotely operated in the remote control room).
