## Indonesia Electric Overview

### 1. Comparison between Indonesia and TEPCO

	Indonesia <sup>*</sup>	TEPCO
Generation Facilities	21.46 GW	61.835 GW
Hydroelectric	3.2 GW	8.99 GW
Thermal	17.86 GW	35.53 GW
Geothermal	0.4 GW	0.003 GW
Nuclear	-	17.31 GW
Maximum Power Demand	18.9 GW	64.3GW(Jul.2001)
Electric Power Sold	100.1 TWh	287.6 TWh

(Indonesia: end of Dec. 2004, TEPCO: End of FY 2006)

\* PLN and its affiliated companies excluding IPPs

### 2. PLN

PT PLN (Persero) is under the control of the Ministry of Energy and Mineral Resources. Electricity is generated by PT PLN (Persero), its affiliated companies, and IPPs, while transmission and distribution are managed solely by PT PLN (Persero).

### 3. Electric power demand

Electric power demand temporarily stagnated in 1998 due to the Asian Currency Crisis, however, the demand is increasing, reflecting economic recovery.

In Java-Bali grid system to which Paiton complex is connected, development of power resources of the total of 54.56GW, most of which will consist of coal-fired and gas combined cycle thermal power is planned by 2025.
