

Outline of “The Study on Optimal Power Generation for Peak Demand in Turkey”

1. Project Period
From September 2009 to August 2010 (Planned)
2. Objective
Investigation of formulating a power development plan designed to meet the peak demand growth in Turkey.
3. Description
 - (1) Formulating an optimal power development plan to meet the peak demand (from 2010 to 2030),
 - (2) Study of possible plans for peak power sources that is suitable for the electricity situation and natural social environment in Turkey.
 - (3) Transfer of the technologies related to the above study to Turkish counterpart agency
4. Client
Japan International Cooperation Agency (JICA)
