1 The value of Radioactivity density is the sum of the value of volatile nuclide's density and the value of paritulate nuclide's density

. E - means . x 10 -

Data of other nuclides are under examination.

2 Statutory density limit to the 3-month average density of radioactive nuclides contained in the air that humans breathe.

In the case of more than 2 nuclides, summation of scaling factor for each statutory density is compared to 1.
