

Revision to the operation should the planned blackouts are implemented

Based on the “countermeasures for electricity supply and demand balance during summertime” indicated by the government, from June 20 (Mon), we will revise the operation of the planned blackouts should we have to implement the planned blackouts.

## 1. Grouping of the planned blackouts

### (1) Future groupings and additional areas subject to blackouts

In principle, there is no change to the groupings as we continue to use the same groupings we implemented this March.

From now on, by revising the operation of the electricity supply route and the method to supply electricity to railroads, customers who were not subject to blackouts in March are, in principle, subject to planned blackouts. <exhibit 1>

### (2) Notification of the groupings

① From June 15 (Wed), we will indicate your group on the monthly “notification of the electricity consumption (meter reading voucher)”. You are requested to confirm.

② From today, you can search your groupings on our website (computer and mobile). In the past, there were cases that several groups were shown. We revised the website so that only one group will be shown. <exhibit 2>

## 2. Number and duration of planned blackouts

We continue to change each group’s planned blackout time everyday. In order to lower customers’ burden by the blackouts as much as possible, we limit the number of planned blackouts to once in a day. We also shorten the duration from the previous three hours to “two hours between 9:30 am to 8:00 pm”.

We will announce the plan for the number and duration of planned blackouts on our website from June 15 (Wed).

<Blackouts time>

Time slot #1 two hours between 9:30 am and 12:10 pm

Time slot #2 two hours between 11:30 am and 2:10 pm

Time slot #3 two hours between 1:30 pm and 4:10 pm

Time slot #4 two hours between 3:30 pm and 6:10 pm

Time slot #5 two hours between 5:30 pm and 8:00 pm

Should the planned blackouts are implemented, we will announce the planned blackouts time for each group on our website and “automatic telephone information service for planned blackouts (0120-925-433)” that we are planning to start operation from July 1.

<Exhibit 1> the detail of the subject area by groups [applicable from June 20, 2011(Mon)]

<Exhibit 2> methods to notify the planned blackouts groups

■ Details of grouped areas for planned blackout (applicable from June 20, 2011)

\* In case planned blackout is necessary, all or part of A to E section are will be subject to blackout depending on the power demand-supply balance of the day.

\* blackout may be implemented partially in each section

\* The blackout area may be changed in order to continue power supply to train system and medical institution and in case of change of supply route.

\* As for notification to customers, we will individually inform the group of the subject area by “notification of the electricity consumption (meter reading voucher)”that we distribute at the time of meter reading etc.

\* If you would like to check the group # beforehand, you may want to search on our website (for computers and for cell phones).

Group 1

	Prefecture/Area	detail of the area	No. of customers (10k)
A	Tochigi	Sakura City, Utsunomiya City, Takanezawa Town, Shimotsuke City, Kaminogawa Town, Oyama City, Moka City, Otawara City, Nasukarasuyama City, Nasushiobara City, Nakagawa Town, Nasu Town, Mashiko Town, Ichikai Town, Haga Town, Motegi Town, Yaita City	27
B	Gunma	Midori City, Isesaki City, Kiryu City, Takayama Village, Nakanajo Town, Higashiagatsuma Town, Takasaki City, Tamamura Village, Shibukawa City, Numata City, Maebashi City, Ueno Village, Kanna Town, Fujioka City, Yoshioka Town, Shinto Village, Minakami Town, Showa Village, Kawaba Village, Katashina Village	30
C	Saitama	Fujimino City, Sayama City, Toda City, Shiki City, Tokorozawa City, Niiza City, Kawagoe City, Yokose Town, Minano Town, Ogano Town, Higashichichibu Village, Chichibu City, Asaka City, Miyoshi Town, Iruma City, Hanno City, Tokigawa Town, Ogawa Town, Fujimi City, Wako City	87
	Tama area	Komae City, Mitaka City, Kodaira City, Kiyose City, Nishitokyo City, Chofu City, Higashikurume City, Higashimurayama City, Fuchu City, Musashino City, Higashiyamato City	
D	Chiba	Isumi City, Kyonan Town, Onjuku Town, Otaki Town, Kamagaya City, Kamogawa City, Tateyama City, Kimitsu City, Sakura City, Shibayama Town, Oamishirasato Town, Yotsukaido City, Ichihara City, Ichikawa City, Narashino City, Katsuura City, Matsudo City, Chiba City (Inage Ward, Hanamigawa Ward, Wakaba Ward, Chuo Ward, Midori Ward), Funabashi City, Sodegaura City, Ichinomiya Town, Chosei Village, Chonan Town, Nagara Town, Shirako Town, Mutsuzawa Town, Togane City, Minamiboso City, Kashiwa City, Shiroi City, Yachimata City, Futtu City, Tomisato City, Mobarra City, Kisarazu City, Noda City, Nagareyama City	97
E	Kanagawa	Kiyokawa Village, Ayase City, Isehara City, Yokosuka City, Yokohama City (Isogo Ward, Sakae Ward, Kanazawa Ward, Totsuka Ward, Konan Ward, Izumi Ward, Naka Ward, Tsurumi Ward, Minami Ward), Ebina City, Kamakura City, Chigasaki City, Atsugi City, Samukawa Town, Zama City, Zushi City, Kawasaki City (Kawasaki Ward), Sagami-hara City (Minami Ward), Yamato City, Fujisawa City, Hiratsuka City	94
	Shizuoka	Gotenba City, Oyama Town	

※There are additional areas subject to blackout by revising the operation of the electricity supply route and the method to ensure continuous supply of electricity to railroads and medical institutions.

335

※Tokyo 23 wards and disaster-affected areas are not subject to planned blackouts. There are other areas not subject to planned blackouts by due diligence of the status of distribution lines etc.

## ■ Details of grouped areas for planned blackout (applicable from June 20, 2011)

\* In case planned blackout is necessary, all or part of A to E section are will be subject to blackout depending on the power demand-supply balance of the day.

\* blackout may be implemented partially in each section

\* The blackout area may be changed in order to continue power supply to train system and medical institution and in case of change of supply route.

\* As for notification to customers, we will individually inform the group of the subject area by "notification of the electricity consumption (meter reading voucher)"that we distribute at the time of meter reading etc.

\* If you would like to check the group # beforehand, you may want to search on our website (for computers and for cell phones).

※There are additional areas subject to blackout by revising the operation of the electricity supply route and the method to ensure continuous supply of electricity to railroads and medical institutions.

※Tokyo 23 wards and disaster-affected areas are not subject to planned blackouts. There are other areas not subject to planned blackouts by due diligence of the status of distribution lines etc.

## How to announce planned blackout groups

We will inform you with planned outage groups including newly added areas in the following methods.

### 1. Low-voltage Electricity Customers (Residential Users etc.)

#### (1) Group Status Notification per Meter Reading Slip

- Group designation will be indicated in the lower right-hand column of the monthly Meter Reading Slip for the period of "Wednesday, June 15th–Friday, September 30th, 2011"
- Customers who normally receive their Meter Reading Slips through regular postage delivery will be notified of their group status via separate direct mailings.

Your Group Here

#### 《Consideration for notice by Meter Reading Slips》

- Those whose groups were not indicated in your slip are excluded from planned blackouts in principle. If we revise operations of supply routes and they are included in planned blackouts, we will individually inform them.
- Your group may not be indicated in your meter reading slips if you have amended contracts with us since May 2011 due to new constructions or renovations. We apologize for bothering you, but please confirm your group on our web site.
- Please confirm your group on our web site if you are customers of public street lights or lights with fixed rates to whom we do not deliver meter reading slips.

## (2) TEPCO Home & Mobile Website Notifications

- You can now be confirmed by inputting your registered customer address. If multiple groups are displayed, please input your customer number to specify your group, though you used to have no other way than contacting our customer center.
- From Thursday, June 9, you can search your groups on our web sites.
  - \* As we previously announced, you can also confirm your group from sheets of regional blackout groups in PDF or excel.

[TEPCO web pages]

PC : <http://www.tepco.co.jp/>

携帯 : <http://www.tepco.co.jp/i/>

### ◀Group Search Display Image▶

\* By inputting your customer address per each prefectural and city governments, municipality, town name and blocks, your group will be displayed.

\* As a result of your search, if multiple groups are displayed, you can identify your group by inputting your customer number in your Meter Reading Slip.

The image shows two screenshots of the TEPCO website. The left screenshot is titled "計画停電情報 (グループ検索)" and has a red box around the section "■お住まいのエリアから計画停電グループを調べる". An arrow points to the right screenshot, which shows the search results for "東京都葛飾区青柳1丁目" and identifies it as the "第1-Cグループ". A red box highlights the text "Identifying your group" above the results.

### In case multiple groups displayed

The image shows a sequence of three screenshots. The first screenshot shows search results for "東京都葛飾区青柳1丁目" with three groups listed: "第2-Aグループ", "第2-Bグループ", and "第3-Bグループ". A blue box highlights the text "In case multiple groups displayed". An arrow points to the second screenshot, which is titled "計画停電情報 (グループ検索)" and has a red box around the section "■お客さま番号から計画停電グループを調べる". A blue box highlights the input fields for "お客さま番号" (Customer Number) and "支分番号" (Division Number). An arrow points to the third screenshot, which shows the search results for "第2-Bグループ" identified by the customer number. A red box highlights the text "Identifying your group" above the results.

- If web page are not available, please contact out customer center.

## 2. High voltage customers whose contract capacity is below 500kW

Along with low-voltage users such as residential customers, notification will be provided to these high-voltage customers.

## 3. Customers whose contract capacity exceeds 500kW

Individual customer visits will be made to request cutbacks, answer inquiries and provide information etc..

## 4. Points to Consider

- Regarding this recent group division announcement, coverage is set based on designated residential unit areas. Hence, even if your group falls under a designated area, there is a possibility that it may not be subject to planned blackouts.
- If you have little choice but implement planned blackouts between Thursday, June 9 and Sunday, June 19, we will implement them based on groups we previously announced last March.
- Those who receive electricity from PPS (power producer and supplier) are included in planned blackouts.

END

### <Points to Consider in case of planned blackouts>

- In case of blackouts, please turn off the breaker to protect against fire and unplug electric appliances from the outlet.
- Traffic signals may be suddenly turned off and please be careful when you cross an intersection.
- Please be careful as elevators, automatic doors, automatically locked doors, and multi-storey car parks do not work. Especially, please refrain from taking elevators when blackouts are planned.
- We apologize in advance for possible partial blackouts if we implement blackouts nearby areas.
