

Periodic measurement and the evaluation results of radioactive materials at  
Kashiwazaki Kariwa Nuclear Power Station

Sampling date : May 12th, 2011

Measurement & evaluation date : June 14th, 2011

Place of sampling		Nuclide	Density (Bq/lit)	Detectable Lower Limit (Bq/lit)	Ingestion Limit (Bq/lit)
Milk (raw milk)	Higashinagatori, Kashiwazaki city	Cesium-137	0.025	0.014	200
	Kitajo, Kashiwazaki city	Cesium-134	0.025	0.020	
		Cesium-137	0.021	0.015	

※"Bq/kg" is an amount of radioactivity contained in the 1kg of raw milk.

※Unit for detectable lower limit should be "Bq/kg". However, we use "Bq/lit" which is the unit we use when reporting to the committee based on safety agreement.
