

Evaluation status of exposure dose for workers in charge of the emergency works at  
Fukushima Daiichi Nuclear Power Station  
Detailed examination on workers with over 20mSv

We are continuing measurement and evaluation of exposure dose for workers in charge of the emergency works at Fukushima Daiichi Nuclear Power Station.

We are having workers with over 20mSv of dose measured in detail at JAEA.

On July 20 we reported evaluation status of exposure dose for workers with over 50mSv of dose. This time we report evaluation status of exposure dose for workers with over 20mSv and less or equal to 50mSv of dose.

**Table 1** Evaluation status of exposure dose for workers with over 20mSv and less or equal to 50mSv of dose (Reported to MHLW on July 29)

Distribution of internal exposure dose for workers in charge of the emergency works who were checked by WBC by July 25 ( excerpt )

### Report

As a result of reevaluation such as detailed measurement by JAEA on workers described above, the number of persons changed from 287 (TEPCO employee: 180 Contractors: 107) in the previous report on July 29 to 251 (TEPCO employee: 176 Contractors: 75) . ( Table 2 )

**Table 2** Our evaluation result for workers “over 20mSv and less or equal to 50mSv”

Segment ( mSv )	March			April		
	TEPCO employee	Contractors	Total	TEPCO employee	Contractors	Total
Over 20 ~ less or equal to 50	176	73	249	0	2	2
Over 10 ~ less or equal to 20	4	3	7	0	0	0
Less or equal to 10	0	23	23	0	5	5
Total	180	99	279	0	7(* 1)	7

\* 1 We found duplication in the registration thus reduced one from the report on July 29 ( Reference )

While the breakdown of 287 persons (Table 1) in the report on July 29 decreased to 256 persons (Table 2), the number for “over 20 and less or equal to 50” is as below, reflecting additionally evaluated persons and reevaluated persons based

on the behavioral investigation. ( Table 3 )
