

Nuclide analysis results of ocean soil

Reference

(Data summarized on September 14)

Place of Sampling	8km offshore of Odaka-ku	8km offshore of Haramachi-ku	
Time of Sampling	08:50 Sep 13 2011	09:50 Sep 13 2011	
Detected Nuclides (Half-life)	Density of sample (Bq/kg)		
I-131 (about 8 days)	ND	ND	
Cs-134 (about 2 years)	35	110	
Cs-137 (about 30 years)	39	130	

* Data of other nuclides are under evaluation.

* "ND" means the sampled data is below measurable limit. I-131: approx. 4Bq/kg)

Please note that these nuclides are sometimes detected even when they are below the limits, contingent on the detector or samples.
