

Nuclide analysis results of ocean soil

Reference

(Data summarized on September 15)

Place of Sampling	15km offshore of Minamisoma city		
Time of Sampling	08:45 Sep 14 2011		
Detected Nuclides (Half-life)	Density of sample (Bq/kg)		
I-131 (about 8 days)	ND		
Cs-134 (about 2 years)	20		
Cs-137 (about 30 years)	24		

\* Data of other nuclides are under evaluation.

\* "ND" means the sampled data is below measurable limit. I-131: approx. 2Bq/kg)  
 they are below the limits, contingent on the detector or samples.

Please note that these nuclides are sometimes detected even when
