

## Appendix ③ The trend of electricity sold

- ✓ The volume of electricity sold this summer (total of July and August) was ▲14.0%\* in comparison with last year, significantly lower.  
※We estimate that due to extremely hot weather of last year, approx ▲3% was from ambient temperature.
- ✓ All of large customers, small customers and households recorded two digits of reduction. This was on account of cooperation by customers in conserving electricity consumption.

### Volume of electricity sold compared to last year

|                        | July   | August | Total  |
|------------------------|--------|--------|--------|
| Large customers        | ▲12.8% | ▲15.4% | ▲14.1% |
| Small customers        | ▲12.9% | ▲18.2% | ▲15.7% |
| Households             | ▲5.8%  | ▲17.0% | ▲11.8% |
| Total electricity sold | ▲11.0% | ▲16.8% | ▲14.0% |

Note: The volume for small customers and households include a portion of last month's consumption due to measurement schedule.
