

Nuclide analysis results of ocean soil

Reference

(Data summarized on October 5)

Place of Sampling	Shallow Draft Quay				
Time of Sampling	October 4, 2011 11:00 am				
Detected Nuclides (Half-life)	Density of sample (Bq/kg)				
I-131 (about 8 days)	ND				
Cs-134 (about 2 years)	75,000				
Cs-137 (about 30 years)	92,000				

* Data of other nuclides are under evaluation.

* "ND" means the sampled data is below measurable limit. I-131: approx. 160Bq/kg)

Please note that these nuclides are sometimes detected even when they are below the limits, contingent on the detector or samples.
