

<Reference>

1. TEPCO's actual CO2 emissions and CO2 emission intensity

		Actual(FY)				Target FY2008~2012 (5-year average.)
		1990	2009	2010	year-on-year	
CO2 emission intensity	kg-CO2/kWh	0.380	0.324	0.374	+15%	20% reduction from 1990 (※2)
			(0.384) <sup>※1</sup>	(0.375) <sup>※1</sup>	(▲2%)	
CO2 emissions	kt-CO2	83,600	90,700	109,700	+21%	—
			(107,500) <sup>※1</sup>	(109,900) <sup>※1</sup>	(+2%)	
Electricity Sales Volume	Billion kWh	219.9	280.2	293.4	5%	—

(※1) Before reflecting carbon credits based on "Act on Global Warming Countermeasures"

(※2) Equivalent to 0.304kg-CO2/kWh of intensity

※Carbon credits reflected in fiscal 2010 was approx. 250kt-CO2

2. TEPCO's Actual Performance against Voluntary CO2 Emission Intensity Target
