TEPCO Plant Status of Fukushima Daini Nuclear Power Station (as of 3:00 pm on December 26, 2011)

Appendix

Unit 1 matic shutdown (at 2:48 pm on March 11) ontrol rods are all inserted dual heat removal system(A) is in operation. dual heat removal system (B) is on standby. ctor Coolant Filtering System is in operation (From 6) uring alternative heat removal function in cold wn] a shutdown * (From March 14)	Unit 2 Automatic shutdown (at 2:48 pm on March 11) All control rods are all inserted Residual heat removal system(B) is in operation. Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From July 17) [Securing alternative heat removal function in cold shutdown] Cold shutdown* (From March 14)	Unit 3 Automatic shutdown (at 2:48 pm on March 11) All control rods are all inserted Residual heat removal system(B) is in operation. Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From June 6) [Securing alternative heat removal function in cold	Unit 4 Automatic shutdown (at 2:48 pm on March 11) All control rods are all inserted Residual heat removal system(A) is in operation. Residual heat removal system (B) is on standby. Reactor Coolant Filtering System is in operation (From June 4)
dual heat removal system(A) is in operation. dual heat removal system (B) is on standby. ctor Coolant Filtering System is in operation (From S) uring alternative heat removal function in cold wn] shutdown* (From March 14)	All control rods are all inserted Residual heat removal system(B) is in operation. Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From July 17) [Securing alternative heat removal function in cold shutdown]	All control rods are all inserted Residual heat removal system(B) is in operation. Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From June 6) [Securing alternative heat removal function in cold	All control rods are all inserted Residual heat removal system(A) is in operation. Residual heat removal system (B) is on standby. Reactor Coolant Filtering System is in operation (From June 4)
dual heat removal system(A) is in operation. dual heat removal system (B) is on standby. ctor Coolant Filtering System is in operation (From 6) uring alternative heat removal function in cold wn] shutdown* (From March 14)	Residual heat removal system(B) is in operation. Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From July 17) [Securing alternative heat removal function in cold shutdown]	Residual heat removal system(B) is in operation. Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From June 6) [Securing alternative heat removal function in cold	Residual heat removal system(A) is in operation. Residual heat removal system (B) is on standby. Reactor Coolant Filtering System is in operation (From June 4)
ctor Coolant Filtering System (B) is on standby. ctor Coolant Filtering System is in operation (From 5) uring alternative heat removal function in cold wn] shutdown * (From March 14)	Residual heat removal system (A) is on standby. Reactor Coolant Filtering System is in operation (From July 17) [Securing alternative heat removal function in cold shutdown]	Residual heat removal system (Å) is on standby. Reactor Coolant Filtering System is in operation (From June 6) [Securing alternative heat removal function in cold	Residual heat removal system (B) is on standby. Reactor Coolant Filtering System is in operation (From June 4)
rring alternative heat removal function in cold wn] shutdown* (From March 14)	[Securing alternative heat removal function in cold shutdown]	[Securing alternative heat removal function in cold	,
, ,		shutdown] Cold shutdown* (From March 12)	[Securing alternative heat removal function in cold shutdown] Cold shutdown* (From March 15)
eakage of coolant in PCV	(,	Coa ondaom (Formula of 12)	Cold Shallowin (From Major 10)
	No leakage of coolant in PCV	No leakage of coolant in PCV	No leakage of coolant in PCV
er temperature in Suppression Chamber is stable rally 30).(On March 14, achieved below 100)	Water temperature in Suppression Chamber is stable (generally 30).(On March 14, achieved below 100)	Water temperature in Suppression Chamber is usual (generally 30).(Having maintained below 100 before the earthquake)	Water temperature in Suppression Chamber is stable (generally 30).(On March 15, achieved below 100)
No ventilation (measure to decrease the pressure in PCV) implemented	No ventilation (measure to decrease the pressure in PCV) implemented	No ventilation (measure to decrease the pressure in PCV) implemented	No ventilation (measure to decrease the pressure in PCV) implemented
Received	Received	Received	Received
Emergency diesel generator (B) iving electricity from the emergency diesel generator (A) (B) of Unit 2 The emergency diesel generator (A)(H) are under restoration.	Emergency diesel generator (A)(B) The emergency diesel generators (H) is under inspection.	Emergency diesel generator (A) (B) (H)	Emergency diesel generator (A) (B) (H)
5 pm on March 11, Occurrence of a Specific Incident 3d in Article 10 of the Act on Special Measures Concerning Emergency Preparedness (reactor coolant is leaked (increase ure in PCV)) 3 pm on March 11, judged that no reactor coolant had been			
At 6:33 pm on March 11, Occurrence of a Specific Incident Stipulated in Article 10 of the Act on Special Measures Concerning Nuclear Emergency Preparedness (loss of function to remove residual heat) heat) Others, any reports regarding abnormal	At 6:33 pm on March 11, Occurrence of a Specific Incident Stipulated in Article 10 of the Act on Special Measures Concerning Nuclear Emergency Preparedness (loss of function to remove residual heat) At 7:13 am on March 14, Restored by the start of Residual Heat Removal System (B)		At 6:33 pm on March 11, Occurrence of a Specific Incident Stipulated in Article 10 of the Act on Special Measures Concernin Nuclear Emergency Preparedness (loss of function to remove resident) heat) At 3:42 pm on March 14, Restored by the start of Residual Hea Removal System (B)
Emergency Preparedness (loss of function to suppress	At 5:32 am on March 12, Occurrence of a Specific Incident Stipulated in Article 15 of the Act on Special Measures Concerning Nuclear Emergency Preparedness (loss of function to suppress pressure) At 3:52 pm on March 14, Restored by the decrease of the water temperature in Suppression Chamber below 100		At 6:07 am on March 12, Occurrence of a Specific Incident Stipulated in Article 15 of the Act on Special Measures Concernin Nuclear Emergency Preparedness (loss of function to suppress pressure) At 7:15 am on March 15, Restored by the decrease of the water temperature in Suppression Chamber below 100
