Reduction rate of depreciable asset value

In order to calculate the reduction in value of assets during evacuation, reduction rate of depreciable asset value is set for each account according to the estimated timing of the evacuation order to be lifted.

Instead of using this method, a calculation method based on the actual reduction rate of asset value (ratio calculated by dividing the cumulative depreciation cost by the acquisition cost) according to the time period from the accident to the estimated timing of the evacuation order to be lifted can be selected.
Details on the reduction rate of asset value according to the timing of the evacuation order to be lifted are to be provided.
(Reference: Reduction rate of asset value according to the timing of the evacuation order to be lifted)

| Account | Time period from the accident to the estimated timing <br> of the evacuation order to be lifted |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 24 months | 36 months | 48 months | 60 months | 72 months |
| Building | $26 \%$ | $39 \%$ | $51 \%$ | $64 \%$ | $100 \%$ |
| Buildings and <br> accompanying <br> facilities | $39 \%$ | $55 \%$ | $66 \%$ | $74 \%$ | $100 \%$ |
| Structures | $37 \%$ | $50 \%$ | $60 \%$ | $68 \%$ | $100 \%$ |
| Machinery and <br> equipments | $59 \%$ | $76 \%$ | $100 \%$ | $100 \%$ | $100 \%$ |
| Motor vehicles and <br> transport equipment | $69 \%$ | $88 \%$ | $100 \%$ | $100 \%$ | $100 \%$ |
| Toos, equipment <br> and fixtures | $62 \%$ | $79 \%$ | $100 \%$ | $100 \%$ | $100 \%$ |
