

The Calculation of the Electricity Rates for March 2015 for Each Contract Ampere

© The electricity rates for March 2015 for the Meter-Rate Lighting (B) customers below are calculated based on the assumption that they use the average amount of electricity(\*) for each contract ampere.

\* 10A: 60kWh/month, 15A: 110kWh/month, 20A: 150kWh/month, 30A: 220kWh/month, 40A: 330kWh/month, 50A: 420kWh/month, and 60A: 510kWh/month

| Contract Ampere | Demand Charge | Energy Charge                            |   |  |                             | Renewable Energy Promotion Surcharge | Automated Bank Transfer Discount | Electricity Rates |         |             |
|-----------------|---------------|--|---|--|-----------------------------|--------------------------------------|----------------------------------|-------------------|---------|-------------|
|                 |               | The 1 <sup>st</sup> stage rate (~120kWh) | The 2 <sup>nd</sup> stage rate (121~300kWh) | The 3 <sup>rd</sup> stage rate (301kWh~) | Fuel Cost Adjustment Amount |                                      |                                  |                   |         |             |
| 10 A            | 280.80yen     | + 19.43yen/kWh                           | x 60kWh                                     | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 60kWh                          | + 45yen           | - 54yen | = 1,607yen  |
| 15 A            | 421.20yen     | + 19.43yen/kWh                           | x 110kWh                                    | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 110kWh                         | + 82yen           | - 54yen | = 2,897yen  |
| 20 A            | 561.60yen     | + 19.43yen/kWh                           | x 150kWh                                    | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 150kWh                         | + 112yen          | - 54yen | = 4,153yen  |
| 30 A            | 842.40yen     | + 19.43yen/kWh                           | x 220kWh                                    | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 220kWh                         | + 165yen          | - 54yen | = 6,498yen  |
| 40 A            | 1,123.20yen   | + 19.43yen/kWh                           | x 330kWh                                    | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 330kWh                         | + 247yen          | - 54yen | = 10,143yen |
| 50 A            | 1,404.00yen   | + 19.43yen/kWh                           | x 420kWh                                    | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 420kWh                         | + 315yen          | - 54yen | = 13,440yen |
| 60 A            | 1,684.80yen   | + 19.43yen/kWh                           | x 510kWh                                    | + 25.91yen/kWh                           | x 30kWh                     | + 2.83yen/kWh                        | x 510kWh                         | + 382yen          | - 54yen | = 16,736yen |

(Note 1) The calculated electricity rates above are for the customers who pay the bill through automated bank transfer.

(Note 2) The Renewable Energy Power Promotion Surcharge is calculated by multiplying the Renewable Energy Power Promotion Surcharge Unit Price (May 2014 - April 2015: 0.75yen/kWh) by the Monthly Energy Consumption and rounding down fractions less than one yen.

(Note 3) The calculated electricity rates above include a consumption tax and other costs.
