Note) Ages are as of December 31, 2014

* As there is no age data with 7 workers with whom contact is unavailable, they are included in "No age data" range.

* The values of the exposure doses and the number of the workers in the table above are subject to change, because there are times when APD data are replaced with monthly dose data measured by integral dosimeters or dose data of workers who wore only an integral dosimeter (ex. workers who entered only the Main Anti-earthquake Building) need to be reflected in the table after the publication of the data.
