

### Business Outline of United Wind

- Established in 2013 through the merger of Talco Electronics, dealing with small wind power facility sales and Wind Analytics, analyzing locations suitable for wind power generation.
- The company mainly provides to farmers and commercial facilities one-stop bundled services for small wind power generation (about 10 to 100kW) which includes survey and analysis of wind conditions, finance, installation and construction, product warranty, maintenance and removal that does not require any initial investment.
- This service allows customers to reduce electricity expenses by about 10 to 15%.
